

Measuring pole

Main features:

Weight:	40 g
Lenght:	2 m
Transport lenght:	1 m

Other features:

Measuring pole is used in measurements with laser, where reflective targets are needed.

Reflector can be fixed in determinate height, which enable calculation of Digital Elevation Model.

Measuring pole with circular reflector

Telescopic measuring pole

Main features:

Weight:	2800 g
Maximum length:	4,6 m
Minimum length:	1,50 m

Other features:

During mapping in dense forests with understorey, telescopic pole is often needed.

Height of the reflective target can be adjusted according to the needs.
